

Corporate Profile

2020 / 2021

A GMP Manufacturer of Shari'ah-compliant Pharmaceuticals

About

IKOP Sdn Bhd (formerly known as IIUM Pharmacy Sdn Bhd) is a Malaysian company based in Kuantan that aspires to be a top player in the pharmaceutical industry while consistently complying with the ever-changing quality aspects in pharmaceuticals and dynamic shari'ah requirements. As one of the subsidiaries of IIUM Holdings, we are committed in growing our business to cater needs by providing the best products and services to our customers.

We are prepared to prosper in pharmaceutical business by equipping ourselves with relevant equipments and analytical instruments used extensively in our core activities. Besides the usual business nature of a pharmaceutical manufacturer, IKOP also offers industrial training to students, fresh graduates and employees for hands-on pharmaceutical manufacturing experience as our commitment to nation-building, particularly in providing skilled workforce for the country. In addition, we also provide contract services in research, manufacturing and testing for entrepreneurs and corporations alike.

Producing halal pharmaceuticals is our top priority. This is shown by our commitment in Malaysian halal pharmaceuticals standard, which is a value-added quality system on top of the conventional quality-safety-efficacy triads practised in GMP-certified manufacturers from PIC/S member countries. With JAKIM's globally-recognized halal certification, we are ready to tackle the huge halal market throughout the world.

As of 2020, IKOP has been supplying medications to Malaysian government healthcare sector for three years through Approved Products Purchase List by Ministry of Health Malaysia. With the know-how of supplying mass orders to public hospitals and the latest formation of IIUM Holdings Healthcare Division, this move is expected to give more opportunities for IKOP Sdn Bhd in private healthcare sector.

Corporate Philosophy

VISION

To become a centre of excellence for teaching, training and manufacturing of halalan tayyiban pharmaceuticals.

MISSION

- To deliver superior value halalan tayyiban pharmaceuticals to our stakeholders and customers.
- To deliver well-trained and competent workforce for the pharmaceutical manufacturing sector.

Business Areas

Manufacturing and sales of pharmaceuticals and cosmetics

As of 2020, our manufacturing and sales campaigns focus on two active production lines and products -- external semi-solid and liquid preparations. Due to COVID-19, demand for hand sanitizers increases and we are currently taking part in supplying our in-house formulation of alcohol hand sanitizers throughout Malaysia.
